GENERAL INFORMATION:

The Band suspension by Marchetti provides direct and indirect light, and is available with integrated LEDs or as a version for conventional exchangeable lamps.

Despite its size, Band appears aery and light, because the broad shade consists of slender metallic strips, between which there are irregular and oblique interstices. Thus the light's inside is visible from some angles, while the light does not passes only upwards and downwards, but also sideways in the room.

Band is available in various metallic versions and perfectly adapts to furniture styles and personal tastes.
