GENERAL INFORMATION:

Thanks to its spherical shape, Mineral suspended lamp gives a refined touch to every kind of indoor settings. Its particular marbled polyethylene finish gives a humble material such as polyethylene the highness of a precious material such as marble. Mineral is ideal for creating a light spot in private spaces, using it as a single chandelier, or creating a composition with different dimensions with a rosette, transforming it into a large luminous fulcrum in indoor contract spaces. The suspended lamp is available in three different diameters with a marbled finish with gray or red veins.
